HEIDI, by Johanna Spyri, is probably one of the best known and most cherished of the children's stories throughout the entire world. Printed in many languages, it carries the message the world needs always, that of childlike love for everyone. The miraculous change in an old man's life wrought by the impetuous love radiated by one who sees only the good bears the message we all may heed. The idea is never old fashioned, the expression of it never out of place. Heidi expresses it better than almost anyone can.
