Director's Note

Is That What It's Called . . . Christian Fellowship?

Barta Lee Heiner, Director

I've heard it said that the best marriages consist of two friends that could easily live without each other but choose not to. In other words, two people who each have a sense of self-worth and a reverential admiration for the other choose to form an alliance that is not encumbered by codependency.

Shaw's *Getting Married* explores the relationships between men and women, the necessity for mutual respect in a marriage relationship, and the need for intellectual and social stimulation.

His characters range from those who have, for various reasons, chosen celibacy, to one who has "lived" life to the fullest only to find that the grass was greenest at home. All of this creates an environment that allows us to observe and evaluate our own motives and relationships—perhaps even helping us make better choices in our associations and commitments with one another.

A Climate for Change

Jennie Pardoe, Dramaturg

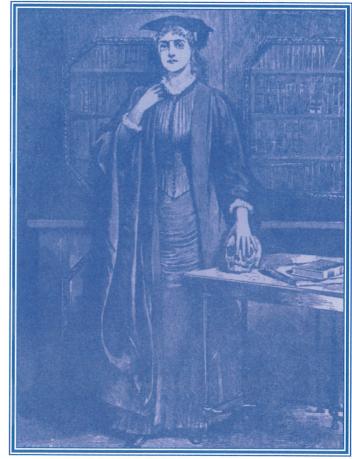

By the time *Getting Married* was written in 1908, people had begun to recognize the political and social changes needed regarding women, especially in the home. We often look at Elizabeth Cady Stanton and Susan B. Anthony as major feminist political leaders; however, the women of America were not alone in the endeavor to make life a little more bearable. English women were beginning to take hold of their own lives and "let some of their duties slip." The need for change also came as women began to educate themselves in matters other than home management.

Though many people argue about what the inciting incident was in the feminist movement, an underlying counterculture calling for a redefinition of feminist roles began to well up in the 1850s and mix with mainstream ideas. This counterculture also called for the end to physical abuse in the home and provisions for women to leave a dangerous marriage. The women in Shaw's plays can find substantial reason in their hesitation to marry in the patterns of abuse and the unavailability of divorce. Physical manifestations of male domination were becoming inescapable for women. There is case after case of women who applied for divorce and were rejected, then sent home with the advice to persevere and endure for the sake of their happiness (see the study guide for specific accounts). Today it is easy to complain about the number of divorces and the ease with which they occur. More liberal divorce laws, however, have protected women from the atrocities that have been rampant throughout history, and women have sought protection and a voice in a variety of ways.

One way in which women had a voice was through spiritual guidance. Though subjection in all physical, emotional, and political manners grew, women were beginning to be seen as spiritual guides in life. While a movement in the mystical was beyond the workings of the times, there was a small group of women who claimed to be clairvoyant. They believed the only was they could be heard was through a "spiritual possession." While most of what women said was regarded as unimportant, these women found that under the "inspiration of heaven" they were able to submit their ideas in an acceptable way to men. (Whether or not Mrs. George is truly a clairvoyant is left for you to decide.)

Another way women found protection was in a "Stockholm marriage." In the play Lesbia requests a partnership with Boxer, possibly referring to this kind of union. To avoid many of the legal bindings of an official wedding, many of the lower classes and even some of the middle class entered into these partnerships where the man and woman would cohabitate without being legally recognized as husband and wife. These marriages were considered base; however, many women also considered them ideal. There was a degree of freedom awarded to women when they were not bound by a wedding contract. They were allowed to walk out on their partners if they were being mistreated or they found life unbearable. While this kind of relationship may have solved many of the problems that the characters in *Getting Married* faced, it was socially unacceptable. This kind of "marriage" would lower their social status, and it is most likely on those grounds that an objection is found.

After studying the brutal force with which most men ruled their wives at the turn of the century, it is interesting that George Bernard Shaw never put the stereotypical bat-

tered wife into his script. After Ibsen's *A Doll's House*, many writers included these tragic women to sell their themes to the audience or readers. Shaw takes a different approach to the issue and writes a comedy on the disagreements that occur in marriages where abuse was not manifest. In a way it is because of this that the play is more accessible to the modern audience.

As many social wrongs have been corrected and many of the things Shaw advocated have been more available socially and politically, the problems of the day have changed. As human beings will never be perfect, the perfect balance may never be reached in the home. Shaw insisted that his work was timeless as people continue to reach toward that delicate balance that brings marriage to an ideal union. Our cultural upbringing has a large effect on the way we value and treat institutions such as marriage. I suggest you consider the viewpoints you encounter in the show today and examine your beliefs and the social practices of marriage that are currently in place.
